PROFESSIONAL SUMMARY

With a strong frontend development background and diverse skill set, I bring value by fixing bugs and ensuring smooth project execution for an enhanced user experience. Implementing Storybook improves component development and styling efficiency. I create tailored frontend components to enhance functionality and user interaction. My expertise in designing components aligned with GraphQL data schema facilitates seamless data integration. Skilled in UI implementation and styling React components using TypeScript, I meet Figma designs. I work with GraphQL to retrieve and manipulate data, designing and implementing schemas. Through effective debugging and collaboration, I ensure successful project outcomes.
